DETAILED ACTION

Election/Restrictions

1. Applicant's election of Invention I and Species A (Spray Nozzle) in the reply filed on March 31, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 13-15 and 30-42 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention and Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 31, 2005.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "flexible spray tip is molded to the nozzle body" recited in claims 5 and 21; the "spray tip is welded against the nozzle body" recited in claim 22 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 23-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 recites a "first means for shaping...", a "second means for directing...", and a "third means for adjusting..." The means plus function language satisfies the three prong test determining whether 35 U.S.C. 112, 6th paragraph has been invoked. Yet, the specification provides no guidance as to the scope of each means plus function

recitation. The metes and bounds of the claim cannot be determined. Claims 23-29 have not been considered under prior art.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 3, 5, 6, 7, 8, 9, 10, 11, 12, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Laauwe (3,990,640).

Laauwe discloses a spray nozzle comprising: a flexible spray tip 12 defining a spray orifice 13; a metering member 16; a driving assembly 23; a nozzle body 9.

8. Claims 1, 3, 4, 10, 12, 16, 17, 18, 19, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Zelna (3,711,020).

Zelna discloses a spray nozzle comprising: a flexible spray tip 2; a metering member 9; a driving assembly 6 (spring, column 3, lines 61); a nozzle body 1.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zelna (3,711,020).

Zelna discloses the limitations of the claimed invention with the exception of the weld. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have replaced the cap and threads of Zelna with a weld to create a thigh seal.
